

# Integration Services for Cognos OEMs and ISVs

## SHORTEN YOUR NEW PRODUCT DEVELOPMENT CYCLE AND ACCELERATE YOUR TIME-TO-MARKET

Embedding the Cognos 8 BI Suite into your company's SaaS, hosted or on-premise delivered application presents new opportunities and added challenges, such as:

- Integration and security
- Branding, automation, self-service customization
- Complex metadata development and localization

And that's just the development effort! How do you go to market with your new solution, efficiently deploy it and provide customer support?

*"We selected LPA because of their extensive Cognos experience and expertise in implementing embedded BI solutions."*

Art Papas, Founder & CEO, BULLHORN

LPA has helped leading OEM and ISV corporations design, integrate, deploy and extend their Cognos-based BI industry solutions. Whether your solution is delivered on-demand, on-premises, hosted or in a hybrid model, LPA provides a full range of targeted services focused on reducing your risk and getting you to market sooner.

Our experts understand the unique issues and proven practices required to reduce implementation risk and ensure that your Cognos-based OEM solution is delivered quickly, correctly and on time - the first time!

From Solution Architecture to Professional Services, LPA's experience will help your company deliver a superior Cognos-based industry solution that will delight your customers.
